

# What can One Talk do for your business?

# verizon<sup>v</sup>

## OFFICE PHONE. SMARTPHONE. ONE NUMBER.

Your business is more mobile, but you still need an office phone. One Talk gives you the platform that connects all your phones and mobile devices so you can pick up when opportunity calls.

## WORK TOGETHER FROM MULTIPLE LOCATIONS.

Your employees need the flexibility to be productive when they're out of the office. In 2015, mobile workers in America exceeded 96 million. One Talk is a customizable system that allows you to set up and make changes to your office and mobile phones that match your business needs. Your team can be more productive and better serve your customers.

## TODAY, OPPORTUNITY DOESN'T KNOCK. IT CALLS.

A missed call may mean a missed opportunity to close a deal, resolve an issue, answer a question or build customer loyalty. More than 70% of people are "tremendously annoyed" when they can't get a live customer-service agent on the phone.<sup>2</sup> One Talk gives you a mobile-first voice communications system that enables you and your employees to immediately build trust, resolve issues quickly and better serve your customers.

**By 2020,** mobile workers will account for more than 72% of the total U.S. workforce.

**3.3**  
The average number of connected devices per employee.

**6-way  
Conference  
Calling**

Merge up to six calls on mobile or desk phones with One Talk.

The following accessories are available for the new models:

The background of the advertisement is a photograph of a workspace. It features a silver laptop with a white paper document resting on its keyboard. In the foreground, there is a dark blue insulated travel mug. A pair of black headphones is visible in the background, resting on a desk. The overall scene is brightly lit, suggesting an office or home workspace environment.
